COURSE INFORMATION:
Water and Society
11:374:115
Spring 2017, T&TH 3:55-5:15PM, RAB 207

CONTACT INFORMATION:
Instructor: Daniel J. Van Abs, PhD, PP/AICP, Associate Professor, Dept of Human Ecology
Office Location: Cook Office Building, 55 Dudley Road, Room 224
Office Hours: Tuesdays, 2:30-3:30PM; Thursdays 1-2PM; and by appointment
Phone: 848-932-9243 (email contact preferred to avoid delays in responses)
Email: vanabs@sebs.rutgers.edu

COURSE MATERIALS:
Course materials are provided through the Sakai course site.

COURSE DESCRIPTION:
This course introduces students to fundamentals of water resources issues world-wide, and how they affect the development, design, evolution and sustainability of societies and economic viability. Included will be discussion of case examples where conflicts over water allocations, drought limitations, water quality problems and catastrophic floods are damaging societies and international relations. Students will be exposed to and discuss current and developing methods for reducing such problems in support of more sustainable societies.

LEARNING OBJECTIVES:
Successful students will be able to describe, distinguish and compare how water issues mold societies in areas that are dry and humid, urban and agrarian, coastal and non-coastal, riparian and inland, including effects on the environment, economies and social equity. Students will be able to list and distinguish applicability of the basic tools for assessing water available, water quality, water demand and wastewater generation. They also will be able to identify and compare the major types of policies and organizations used to mediate water issues within and between nations. Finally, they will be able to discuss generally how water issues are related to other types of environmental issues such as food production, manufacturing and public health.

- SEBS/SAS 21st Century Learning Objectives:
  b. Analyze a contemporary global issue from a multidisciplinary perspective.
  c. Analyze the relationship that science and technology have to a contemporary social issue.

- SEBS/SAS Historical Analysis Learning Objectives:
  h. Understand the bases and development of human and societal endeavors across time and place.
  k. Explain the development of some aspect of a society or culture over time, including the history of ideas or history of science.

- SEBS Governance and Regulation Analysis Objectives:
  5. Use theory and evidence from the social sciences to analyze the decisions made by organizations that affect resource use, the environment, and health; including the organizations involved, the influences on those decisions, and the intended and unintended consequences that are likely to result.

Version: 4 January 2017
ASSIGNMENTS/RESPONSIBILITIES & ASSESSMENT:
Class participation is critical to the learning process, through recitation sessions primarily but also in the lecture sessions. Participation will constitute 25% of the grade. In addition, there will be short topical writing assignments on a weekly basis, which will require the student to understand the relevant lectures and reading and to evaluate an issue or question on the basis of that information. The short assignments will constitute 75% of the grade. There are no quizzes or exams.

OTHER INFORMATION:
Students will be responsible for adhering to the academic integrity policies found at http://academicintegrity.rutgers.edu.

It is important that students have the tools to succeed in this course. Please see the instructor as soon as possible with any difficulties or questions regarding the course materials. In addition, the Office of Student Affairs is available at http://studentaffairs.rutgers.edu for any other needs or concerns.
COURSE SYLLABUS

THE RULES

Adapted from http://academicintegrity.rutgers.edu/integrity.shtml

1. **NO PLAGIARISM**. Plagiarism is essentially theft of intellectual property – the work of others. Give credit where credit is due! Doing so reflects well on them and on you. Students can be failed or referred to the University for discipline if intentional plagiarism is evident.

2. **NO CHEATING** – it destroys the learning experience, demeans and harms you now, and is an exceptionally bad habit for the working world.

3. **LATE ASSIGNMENTS WILL LOSE A GRADE STEP FOR EACH CALENDAR DAY LATE**. For example, if your paper is an A-level product, then it will be marked as a B+ for a day late, a B for 2 days late, etc. *If you must miss a deadline due to bona fide illness or emergency, notify me via email on or before the due date if at all possible, or as soon after as your situation permits.* Proof may be required. However, I do not need to know (and really shouldn’t know) the details of a medical condition or similar personal or family issue.

4. **PARTICIPATION COUNTS**. Only two unexcused absences from class will be accepted without loss of participation credit. Otherwise, you must provide a bona fide excuse for absences – contact one of us by email, provide notification at a prior class, provide a note from a medical office, etc. Proof may be required. Recognize that this is standard business practice, so get used to it.

5. **THERE IS NO EXTRA CREDIT**. No additional assignments or revised work for re-grading will be accepted to offset missing assignments or poor grades. Instead, focus on quality work the first time and make sure assignments are posted on time. I am also willing to answer questions before any work assignment is due, in class, in my office, or by email. Make sure you ask your questions in time to allow for answers.

6. **IF YOU CONTEST A GRADE**, you must do it in writing to Dr. Van Abs. Write your argument presenting evidence supporting a grade change and submit it by email or in person.

7. **POSTING TO SAKAI**. Work must be posted as readable text. Most assignments will be loaded directly to a Sakai text box, but some may be acceptable only as attachments, which must be in MSWord (or a file format directly compatible with MSWord so that I can edit in that format). Posting work as Adobe pdf or any other pdf document or providing a link to Google Docs or other external source is not acceptable. Please note: correct posting to Sakai is the student’s responsibility, including verification that the posting actually worked.

**DO NOT ASSUME THAT A SAKAI POSTING WORKED – ALWAYS VERIFY.**

**Will Rogers** - *People’s minds are changed through observation and not through argument.*

**Albert Einstein** - *Education is what remains after one has forgotten what one has learned in school.*
## Course Schedule and Readings
The course schedule follows; modifications may occur as necessary during the semester. All readings or links to them are posted on Sakai.
